**ABSTRACT:**

*Islam conveys the latest and the most practicable rules for leading a perfect life on earth and also depicts the true incidents of life of hereafter. Incidents of life hereafter are told by the Holy Prophet Muhammad SAAW after his travel from earth to Heavens. Millions people were not admitting this travel so ultimately they deny the information about the life of hereafter described by the Holy Prophet. It is evident that the people of oldest era had some spiritual powers or knowledge of the book that they can travel around the globe or towards bright stars without consuming time. The learned scientists of this era has invented such medias of travelling that has defeated unbelievable hurdles of time and space and now they are again reaching at the level of such scientific knowledge that they are saying that a human being can be travelled from earth to the space without spending time. The theories of relativity and Quantum bond, experiments of teleportation and transportation of photons in space are fore saying of human transportation. It is concluded that present knowledge of scientific experiments are near to admit that the*

*travel of Holy Prophet Muhammad SAAW is admit able and logical.*

**KEYWORDS:** Miraaj-un-Nabi, Heaven Travel, Teleportation, Human Transportation, Life of Hereafter

## 1. Introduction

Quran is the last divine message and manuscript on this globe. It said in Surah 17, Verse No.01 about the travel of Holy Prophet Muhammad SAAW from earth to Heaven / space in these words.

.....<sup>1</sup> سُبْحٰنَ الَّذِيْٓ اَسْرٰى بِعَبْدِهٖ لَيْلًا

That “HE (Almighty) is the most poise (from entire negatives), WHO 'fetched' HIS servant (the holy prophet SAAW) toward 'darked' (areas of universe, the space, above the orbit of earth) .....

Science is touching the extreme heights of its development in this era. There are thousands of inventions through the experiments on material objects of this world. It is strange for a common man that science is utilizing unseen lights, unheard sounds and unknown waves in its labs.<sup>2</sup> But man has still a dire desire to conquer two elements of this universe i.e. Time and Space.<sup>3</sup> We know that there are two elements which are being used in travel, first are medium of travel and second is time. Medium means any ride like taxi, bus, aero plane, legs or rocket. Time means such consumed time which we have to spend for the travel. It can be one second or light years.

---

<sup>1</sup> Al-Quran 17:01

<sup>3</sup> Mein. Margaret, (2016), *Proust's Challenge to Time*, Manchester: Manchester University Press, Oxford Road. P.126

“Man’s effort to conquer time” and space can be calculated for a long times.<sup>4</sup> He trained many animals to travel fast to use less time and cover long journeys. Later, he invented wheel and used it in cart and cycle. In the start of new technical advancement age, he used this wheel in cars and trains. He invented boats and submarines to defeat the hindrance of seas. The next age is of electro mechanical, which gave jets, supersonic, space shuttles and space crafts which cover the journey in seconds. In these days, man has the fastest train in China, name Chinghai Maglio train (Annexure I), which can cover 430 kilometer space in only 1 hour. In United States of America, there is an aero plane, name X15(Annexure II), which can travel 7200 kilometers in only 1 hour. NASA has invented a space craft, name Juno (Annexure III), which can cover 2,65,000 kilometers in 1 hour.

## **2. Historical Evidences**

Man had invented different loud sounds of drums and casks for disbursing their messages from far places. Then the age of postage started for messaging which later converted into telephone and telegram. Television sprinkled all information into each corner of the world with sound and picture. In present era, internet boosted these communications into seconds and multidimensional. Man is still unsatisfactory due to his nature of next achievable step. Man is doing experiments for covering more space in least time. Basically, he wants to get ‘control over time and space’.<sup>5</sup>

We find many incidents of control over time and space in the history

<sup>4</sup> Wylder. Edith, (1971), *The Last Face: Emily Dickson’s Manuscripts*, Albuquerque USA: University of New Mexico Press. P.50

<sup>5</sup> Ibid, p. 63

of man. Scientists of present age are still confound to clarify that how the gigantic stones of Ihram-e-Misar had been moved and adjusted at such an amazing height. ‘Lob Singh Rampa and Edge risky, the experts of some hidden knowledge, said that the Greek of that era had some type of spiritual powers or knowledge that they could move these heavy stones from one place to this vast desert’.<sup>6</sup> Geographical experts of this era has also discovered two civilizations at about thousands mile distance with quite the same environment, language and rites. “On the opposite side of the Globe from Mohenjo daro and Harappa lies Easter Island with the same pattern”.<sup>7</sup> The both civilizations has a closest relation because the both has very same language, living style, housing structure, governing rules, costumes and everything but both are situated at thousands of miles. This similarity also announces that there was a close communication relation between these two cities of ancient world. It looks like that the residents of both cities were habitual to travel in both cities frequently so their travel time must be very short and the medium of travel would be effortless otherwise, as we assume about that era of 3500 years ago, they could not reach other city even after the travel of whole life of a man. History of man displays another example of defeat of time and space. There is a tribe, name Dagoon, in the country of Mali in Africa. The inhabitants of this tribe claim that their forefathers had traveled back from the bright star of south, Sirius. They have an ancient document in which experts found the evidences of a little star which is circulating around the

<sup>7</sup> Jones. Capers, (2006), *The History and Future of Narraganset Bay*, Boca Raton and Florida USA: Universal Publishers. P.55

Sirius like its moon. The scientists of present age started their researches and just invented the same little star circulating around the Sirius which is, of course, unbelievable that how these un-educated people knew the little star about hundred years ago. If science has proven their claim so it is obvious that we have to admit their claim that their forefather had tripped the Sirius. The question arises, if those forefathers had visited the Sirius which is at 8 light years distance, what are those knowledges or expertise which those forefathers had to travel 8 light years distance in their human life.<sup>8</sup>

These incidents are relating to the defeat of time by the hands of ancient man but we have also incidents concerning to the defeat of articles or materials by man. It is evident in many religious books that one man of God, who has knowledge of the book, fetched the royal couch of Queen Saba from the distance of 900 kilometers within the less time of blinking one's eye. It is also witnessed that many spiritual peers were found in other places of the world at the same time. Researchers of present age, working in scientific labs, do not believe on these incidents but there are a huge number of human beings who admit these incidents by their own observations.

### **3. Present Scientific Advancement:**

The experiments to defeat the time and space are still in action in different research labs of the world. Newton presented its theory of Absolute Time, time is unchangeable, and time remains ever same for

---

<sup>8</sup> Temple. Robert, (2001), *The Sirius Mystery*, New York, USA: Random House Publishing Group. P. 56-82

everyone at any place of the world. It is traveling from infinite past to infinite future with the same speed. Newton conveyed that no one can stop or change the speed of time. In the start of twentieth century, Einstein rejected this theory and presented a new theory that material and energy are not two different elements. These are the two dimensions of one element. Material can be converted into energy and energy can be converted into material. Einstein presented the Theory of Relativity,  $E=MC^2$ .<sup>9</sup> This theory clarifies that when an element travel with the speed of light, it can travel with the speed of time. So resultantly, if any article moves at the speed of light, there will be the same time of start and end of its journey. Of course, this speed needs a great energy. According to the same theory, if an article moves or get moved at the extra speed of light, the time will be reduced for it. Now just imagine the speed of your mind that how time it consume to go through the incidents of your whole life. It is an imaginary experiment but scientists are doing much more to assert it.

#### **4. What is Teleportation?**

The scientists of present age invented a new term, Teleportation, with the mutual symptoms of Time travel, Tele communication and Transportation. Teleportation means transportation of one thing from first place to second place with the characteristics that it is finished at first place and rebuild at second place as a copy of original thing. The complete atomic information and elements of teleported thing is shifted from first place to second place then the thing is recollected according to the same

---

<sup>9</sup> Neil Berger, (2015), *The Theory of Relativity: An Other Essays by Albert Einstein*, USA: Open Road Integrated Media. P.21

pattern so the same thing come into existence again. In this way, the both time and space do not hinder in traveling. It is also admitted by the present scientists that in near future, man can also be shifted from one place to other place within eye blinking. The traveler of this method does not travel even one second. In short, “combing properties of telecommunications and transportation to achieve a system called Teleportation”.<sup>10</sup>

### **5. Explanation of Teleportation:**

The new branches of physics, Quantum Mechanics and Quantum Electrodynamics, have started a horizon in the life of teleportation. When scientists combined the Theory of Relativity and Quantum Mechanics, a new prospect aroused. In 1993, Charles Bennett and his researchers, working in IBM and Tomes J Watson Research Center at York Town Heights, New York, verified that teleportation is possible at minimum Quantum parameters.<sup>11</sup> Now the next question was that is it possible that an alive subject can be teleported or not? It is also claimed by the scientists of present age that human kind can also be teleported from one part of the universe to other part of universe with the speed of light. If these scientists can prepare such teleportation room of such specifications then they can teleport the human being also. Scientists claim that through this teleportation, the human being will be finished from the place of departure and will rebuild at the place of arrival with the same senses, remembrances, emotions, dreams and hopes. So scientists are saying that

<sup>11</sup> Bennett. Chalres H., (2006), *Information is Quantum*, retrieved from <https://scholar.google.com/citations?user=mkjGmJEAAA&hl=en> on 16/11/2018

the teleported person will reach at second place with same characteristics but with no original body but they are trying to teleport the man with the same body. “Scientists have been able to teleport particles but Human Teleportation is too far away”<sup>12</sup> but it can imagine that it can be in future.

## **6. Latest Progress in Teleportation:**

Scientists did a lot of experiments in the queue. Americans, Europeans, Russians and Chinese scientists were doing their bests and now one of Chinese scientist announces that he have achieved a great success in the field. On 10th of July 2017, China declared that they have sent a photon through teleportation on a satellite at the distance of 310 kilometer in space. This is the first and great achievement in teleportation experiments. These scientists sent 900 photons in space in the last one month experiments through their laboratory situated in Tibet, China. This success has a previous foot step also by China. In 2010, a team of scientists from Chinghai sent a photon at the distance of 60 kilometer. Last year, China sent a Quantum communication satellite in space and established its earth station in the independent area of Tibet for experiments and control. This satellite is sailing at the distance of 500 kilometer in space.<sup>13</sup> A physics expert, Nicolas Gisin, from the university of Geneva said that this experiment is an evidence that teleportation is possible through Quantum Communication at international level.

A Japanese born American expert of biology, Michio Kaku from the

university of California, said that teleportation of human beings are possible, if they are to be converted in energy.<sup>14</sup> He opined that human teleportation is possible at the end of this century. He wrote many interesting books and his one book ‘Physics of Impossible’ is very famous in the concern.<sup>15</sup> He said that when the first molecule will be teleported to the moon, then the big animals and even human being could be possible to be teleported to the moon. If the science has reached at this place, we can say that next human generations will travel to the stars situated at distance of many light years.

## **7. Conclusion:**

Keeping in view the aims of the study and basic premise of analysis, it is evident that contemporary scientific relevant studies, with the Quranic reference, explained that a human being can be traveled from one place to other even in the space without consumption of time so it is the exact time to admit that the Holy Prophet Muhammad SAAW had travelled from earth to heaven without consumption of time and his described information about the life of hereafter are quite true and actable.
